MODUL7

PUSH-THERMOSTAT EINBAUKÖRPER
CONCEALED PUSH-THERMOSTATIC BOX

WICHTIGE HINWEISE

Produkte aus unserem Hause sind ausschließlich durch sanitäre Fachhandwerker und nach den gültigen Normen zu montieren

Vor der Montage muss das Produkt auf Transportschäden untersucht werden. Nach Einbau des Produkts können Transport- bzw. Oberflächenschäden nicht anerkannt werden.

Vor der Montage muss eine Spülung der Rohrleitungen durchgeführt sowie ein Spülprotokoll erstellt und dem Auftraggeber/Bauherren übergeben werden.

Nach erfolgter Montage muss eine Druckprüfung durchgeführt sowie ein Dichtheitsprüfprotokoll erstellt und dem Auftraggeber/Bauherren übergeben werden.

Unsere Produkte sind nicht für den Einsatz in Dampfbädern, Solebädern oder im Außenbereich konzipiert.

Ab einem Wasserdruck von 5 bar empfehlen wir den Einbau eines Druckminderers.

TECHNISCHE DATEN TECHNICAL DATA

Betriebsdruck <i>working pressure</i>		max. 10 bar
Empfohlener Betriebsdruck <i>recommended working pressure</i>	min. 0,5 bar	max. 5 bar
Prüfdruck <i>test pressure</i>		max. 11 bar
Heißwassertemperatur <i>hot water temperature</i>		max. 65° C
Heißwassersperre <i>hot water safety stop</i>		38° C

IMPORTANT

Our products are to be installed exclusively by specialist sanitary tradesmen and must be installed in accordance with the applicable standards.

Before installation, the product must be inspected for transport damage. After installation of the product, no claims can be made for transport or surface damage.

Before installation, the pipelines must be flushed and a flushing report must be drawn up and handed over to the client/builder.

After installation, a pressure test must be done and a leak test report must be drawn up and handed over to the client/builder.

Our products are not designed for use in steam baths, brine baths or outdoor areas.

From a water pressure of 5 bar, we recommend the installation of a pressure reducer.
